

## **CBM-CHY86** A Plug & Play Automatic Stereo Mute & Speaker Switch for the 1997-'02 Jeep, TJ with OE stereo and a 2 or 4-Speaker System

### Hear 2-Way Radio Voice Through Factory Jeep Speakers

**CBM-CHY86** is a automatic voice activated stereo muting and speaker switching device that allows seamless interaction between the factory **Jeep Stereo** and CB or other radio receiving device equipped with a mono 1/8" mono speaker output jack.

**Placement of **CBM-CHY86**** is between the **Jeep Stereo** and the **Factory Speakers**. And mounted behind the dash near the stereo.

**When voice** is present (volume set at a pleasant listening level) on a 2 way-radio the stereo automatically mutes and switches the two front speaker to the 2 way radio voice. It remains switched and muted for three seconds after the last voice message is received, then returns back to normal stereo play.

### **Installs In Minutes with No Adjustments to make or Modifications Needed**

- **Unplug the 2 seven Pin female factory plugs from the back of the factory Jeep Stereo.**
- (1) Plug the two 7-pin female plugs from the **CBM-CHY86** into the **Jeep Stereo**.
  - (2) Plug the two 7-pin male plugs from **CBM-CHY86** into the two factory side 7-pin female harness.
  - (3) Plug the 3.5 mm (1/8") male connector from the **CBM-CHY86** into the Two-Way Radio, Scanner or GPS 1/8" External Speaker Output Socket.
  - (4) Black Lead wire of the **CBM-CHY86** with a ring terminal connects to the chassis ground. Attach to a clean metal surface of the vehicle with a screw or bolt.
